

Save That Stuff, Inc can process the following foam ♻️ items provided they are separated from other materials:

- Foam ♻️ cups and containers. Cups do not need to be rinsed but must be empty.
- Foam ♻️ egg cartons.
- Rinsed foam ♻️ meat trays.
- Foam ♻️ food trays/lunch trays. Must be either rinsed-off or minimally contaminated with no food remnants.
- Most packaging foam ♻️.

We cannot process flame-retardant material, such as home insulation sheets.

Save That Stuff, Inc does not accept packaging peanuts. Please call 800-828-2214 or go to [www.loosefillpackaging.com](http://www.loosefillpackaging.com) for drop-off sites to find a home for them. Packaging peanuts are usually readily reusable, so it is better for the environment to keep them in their current form. (You might want to consider re-selling them)

Save That Stuff, Inc is a leading Boston based waste and resource management company. We are a company that prioritizes saving our customers time and money, along with what they throw away. We help over three thousand New England businesses and institutions safely and efficiently dispose of a wide range of recoverable materials otherwise destined for a landfill. State of the art equipment compacts the foam to  $\frac{1}{40}$ <sup>th</sup> of its original size which allows for economical transportation of the material.

## 4 SIMPLE STEPS FOR RECYCLING FOAM ♻️

**Step 1**  
Collect Foam

**Step 2**  
Compact the foam

**Step 3**  
Efficiently transport the densified foam

**Step 4**  
Make new products like picture frames, mouldings, and horticultural trays
